

**UNITED STATES DISTRICT COURT
WESTERN DISTRICT OF PENNSYLVANIA**

BLAIR DOUGLASS,

Plaintiff,

v.

FANCY SPRINKLES LLC,

Defendant.

Civil Action No. 2:23-cv-180

**COMPLAINT FOR DECLARATORY
AND INJUNCTIVE RELIEF**

COMPLAINT FOR DECLARATORY AND INJUNCTIVE RELIEF

Plaintiff Blair Douglass (“Douglass” or “Plaintiff”) brings this action against Defendant Fancy Sprinkles LLC (“Fancy Sprinkles” or “Defendant”). Plaintiff makes the following allegations pursuant to the investigation of counsel and based upon information and belief, except as to the allegations specifically pertaining to Plaintiff, which are based on personal knowledge:

NATURE AND SUMMARY OF THE ACTION

1. Douglass is legally blind and is therefore a member of a protected class under Title III of the Americans with Disabilities Act (“ADA”), 42 U.S.C. § 12102(2), and the regulations implementing the ADA set forth at 28 CFR §§ 36.101 *et seq.* As a result of his blindness, Douglass relies on screen access software to access digital content, like a text message, an email, or a website.

2. Defendant is a retailer that sells sprinkles to consumers. In order to access, research, or purchase Defendant’s products and services, consumers may visit Defendant’s online store, located at <https://www.fancysprinkles.com/> (the “Digital Platform”).

3. This action arises from Defendant’s failure to make the Digital Platform compatible with screen access software, thereby denying blind individuals,¹ including Douglass, full and equal access to Defendant’s products and services.

4. The fact that Defendant’s Digital Platform is inaccessible is unsurprising. In a 2011 study entitled, *Retrofitting Accessibility: The Legal Inequality of After-the-Fact Online Access for Persons with Disabilities in the United States*, researchers explained, “[w]ith a minority of exceptions, providing accessibility is ignored in favor of faster market entrance for a product or simply because of long-standing assumptions regarding the need for accessibility and the cost of creating accessible products.”²

5. This exclusionary approach persists among creators notwithstanding the fact that:

Nothing about technology makes it inherently accessible or inaccessible. Most of today’s technologies are digital, meaning that they are made up of zeros and ones, and there is nothing inherently visual or auditory about zeros and ones. Digital information is not inherently accessible or inaccessible, but the choices made by those developing and implementing technology determine whether a technology will ultimately be accessible or inaccessible. This is particularly true online, given the rapid pace of technological change and introduction of new web-enabled technologies, since online technologies are often obsolete before they are made accessible.³

6. Douglass files this lawsuit because Defendant’s policies exclude him—and millions of other potential consumers—from fully and equally enjoying Defendant’s products and services, and because “[i]f people with disabilities are to move from being the most disadvantaged

¹ Douglass uses the word “blind” to describe individuals who, as a result of a visual impairment, have substantially limited eyesight. This includes individuals who have no vision or who have low vision. See James H. Omvig, *Why Use the Word “Blind”?*, Braille Monitor (Jan. 2009), <https://nfb.org/sites/default/files/images/nfb/publications/bm/bm09/bm0901/bm090107.htm>.

² Brian Wentz, Paul T. Jaeger, and Jonathan Lazar, *Retrofitting Accessibility: The Legal Inequality of After-the-Fact Online Access for Persons with Disabilities in the United States*, First Monday, Vol. 16, No. 11 (Nov. 7, 2011), available at <https://firstmonday.org/ojs/index.php/fm/article/download/3666/3077>.

³ *Id.*

population online to equal residents of cyberspace,”⁴ we must reject the mentality of retrofitting in favor of a philosophy that emphasizes the design and development of technology that is inclusive of people with disabilities from launch.

7. Accordingly, Douglass seeks an order requiring that Defendant make its Digital Platform accessible and adopt sufficient policies and practices to ensure the Digital Platform does not become inaccessible again in the future.

JURISDICTION AND VENUE

8. The claims alleged arise under Title III such that this Court’s jurisdiction is invoked pursuant to 28 U.S.C. § 1331 and 42 U.S.C. § 12188.

9. Defendant attempts to, and indeed does, participate in the Commonwealth’s economic life by offering and providing products and services over the internet to Pennsylvania residents, including Douglass. Unlike, for example, a winery that may not be able to sell and ship wine to consumers in certain states, Defendant purposefully avails itself of the benefits and advantages of operating an interactive, online business open 24-hours a day, 7-days a week, 365-days a year to Pennsylvania residents.⁵

⁴ *Id.*

⁵ See *Gniewkowski v. Lettuce Entertain You Enters.*, No. 2:16-cv-1898-AJS, Order, ECF 123 (W.D. Pa. Apr. 25, 2017), *clarified by Order of Court*, ECF 169 (W.D. Pa. June 22, 2017) (Judge Schwab) (*citing Zippo Mfg. Co. v. Zippo Dot Com, Inc.*, 952 F. Supp. 1119 (W.D. Pa. 1997) (exercising specific personal jurisdiction over forum plaintiff’s website accessibility claims against out-of-forum hotel operator)); *Law School Admission Council, Inc. v. Tatro*, 153 F. Supp. 3d 714, 720-21 (E.D. Pa. 2015) (exercising personal jurisdiction over out-of-forum website operator); *Access Now Inc. v. Otter Products, LLC*, 280 F. Supp. 3d 287 (D. Mass. 2017) (exercising personal jurisdiction over forum plaintiff’s website accessibility claims against out-of-forum website operator); *Access Now, Inc. v. Sportswear, Inc.*, 298 F. Supp. 3d 296 (D. Mass. 2018) (same).

10. These online interactions between Defendant and Pennsylvania residents involve, and indeed require, Defendant's knowing and repeated transmission of computer files over the internet in Pennsylvania.

11. Indeed, upon information and belief, Defendant places cookies on computers and other electronic devices physically located in Pennsylvania every time a Pennsylvania resident visits the Digital Platform.

12. Douglass was injured when he attempted to access the Digital Platform from Pittsburgh, Pennsylvania, but encountered communication barriers that denied him full and equal access to Defendant's online products, content, and services.

13. Venue in this District is proper under 28 U.S.C. § 1391(b)(2) because this is the judicial district in which a substantial part of the acts and omissions giving rise to Douglass's claims occurred.

PARTIES

14. Douglass is a natural person over the age of 18. He resides in and is a citizen of Pittsburgh, Pennsylvania, located in Allegheny County.

15. He works for an area university as a Program Administrator, managing all phases of the admission process for a highly competitive science training program, among other things. Douglass is also a licensed Pennsylvania attorney. He graduated from the University of Pittsburgh School of Law. During his enrollment at Pitt Law, Douglass completed a judicial internship in the United States District Court for the Western District of Pennsylvania.

16. Douglass has advocated for blind individuals his entire life and long before filing a lawsuit.⁶

17. On two occasions, the United States District Court for the Western District of Pennsylvania has appointed Douglass to represent class members in class actions whose claims were substantially similar to the claims asserted in this individual action. *Douglass v. Optavia, Inc.*, No. 2:22-cv-00594-CCW, 2022 U.S. Dist. LEXIS 170130, at *2-3 (W.D. Pa. Sept. 14, 2022) (“The Court finds that Plaintiff Blair Douglass will fairly and adequately protect the interests of the Settlement Class. As a result, the Court appoints and designates Mr. Douglass as representative of the Settlement Class.”); *Murphy v. Charles Tyrwhitt, Inc.*, No. 1:20-cv-00056, 2020 U.S. Dist. LEXIS 222540, at *9, *34 (W.D. Pa. Nov. 25, 2020), *report and recommendation adopted by* 2021 U.S. Dist. LEXIS 144 (W.D. Pa. Jan. 4, 2021) (“Based on the above, the Court finds that Anthony Hammond Murphy and Blair Douglas [sic] will fairly and adequately represent the class as representative Plaintiffs and that their proposed class counsel will fairly and adequately protect the interests of the class and provide capable legal representation. The adequacy requirement of Rule 23(a) is satisfied.”).

18. Defendant is a California limited liability company with a principal place of business in California.

⁶ Treshea N. Wade, *Blindness doesn't keep teen from success*, Trib Total Media (May 30, 2005), <https://archive.triblive.com/news/blindness-doesnt-keep-teen-from-success/> (last accessed Jan. 13, 2023) (“I am not striving necessarily for perfection, but I just want to do well[.] ...Sure I have a disability. But it's a disability that anyone can readily overcome with a lot of hard work.”); Zak Koeske, *Pitt student aims to rise above stereotype*, Pittsburgh Post-Gazette (July 23, 2009), <https://www.post-gazette.com/local/south/2009/07/23/Pitt-student-aims-to-rise-above-stereotype/stories/200907230364> (last accessed Jan. 13, 2023) (“Blindness can't hold you back from doing anything you want to do[.] ...Blindness is simply a physical condition. You have to make a few adaptations, but those aren't big enough to affect your ability to do a job competently. ...There are always going to be some people who doubt your ability. ... I have no trouble trying to prove them wrong.”).

19. Defendant owns, operates, and/or controls its Digital Platform and is responsible for the policies, practices, and procedures concerning the Digital Platform’s development and maintenance.

20. Upon information and belief, approximately 100,00 consumers visit the Digital Platform each month.

21. As of January 2023, Defendant maintained 23 different advertising campaigns targeting Pennsylvania consumers on Facebook and Instagram.

STANDING UP FOR TITLE III OF THE ADA

22. “Congress passed the ADA in 1990 to fix a serious problem—namely, the seclusion of people with disabilities resulting in explicit and implicit discrimination. . . . The disabled population hoped that, as a result of the ADA, their lives would no longer be shaped by limited access and the inability to choose. . . . However, reality—a lack of compliance with the ADA and severe underenforcement of the statute—soon destroyed this hope.”⁷

23. More than thirty years “after the passage of the ADA, numerous facilities are still not compliant leaving the disabled population in a second-class citizenship limbo. Title III of the ADA allows both the U.S. Attorney General⁸ and private individuals⁹ to sue, but the rate at which

⁷ Kelly Johnson, *Testers Standing up for the Title III of the ADA*, 59 *Cas. W. Res. L. Rev.* 683, 684 (2009), <http://scholarlycommons.law.case.edu/caselrev/vol59/iss3/6> (citing H.R. REP. No. 101-485, pt. 2, at 28-29 (1990); Elizabeth Keadle Markey, *The ADA’s Last Stand?: Standing and the Americans with Disabilities Act*, 71 *Fordham L. Rev.* 185 (2002) (arguing for a more lenient standard for standing under the ADA); and Samuel R. Bagenstos, *The Perversity of Limited Civil Rights Remedies: The Case of “Abusive” ADA Litigation*, 54 *UCLA L. Rev.* 1, 3 (2006) (discussing the need for private enforcement in Title III)).

⁸ 42 U.S.C. § 12188(b).

⁹ 42 U.S.C. § 12188(a).

[] the Attorney General [is] bringing suit seeking compliance is extremely low. The Department of Justice’s Disability Section, tasked with ADA enforcement, is understaffed[.]”¹⁰

24. Thus, “private suits by necessity represent the main tool for ensuring compliance with Congress’ intent in passing the ADA,”¹¹ most of which suits “are brought by a small number of private plaintiffs who view themselves as champions of the disabled.”¹²

25. The U.S. Department of Justice (“DOJ”) supports this dynamic, recognizing that because it “cannot investigate every place of public accommodation,” “[p]rivate plaintiffs play an important role in enforcing the ADA[.]”¹³

26. Courts recognize this dynamic too.

[Defendant] also points to the number of cases filed by the same plaintiff in this jurisdiction. Counsel have filed nine cases in this jurisdiction on behalf of [the plaintiff]. I am not impressed by this argument. If the ADA were enforced directly by the government, as are, for example, the fair housing laws, it is likely that government lawyers would have reached out to disabled individuals — “testers” as they are called — to find out which businesses were complying and which were not. [The named plaintiff] has functioned here as a “tester,” which is entirely appropriate.¹⁴

¹⁰ Johnson, *supra* note 7.

¹² *Id.* (quoting *Molski v. Evergreen Dynasty Corp.*, 500 F.3d 1047, 1062 (9th Cir. 2007)); *D’Lil v. Best Western Encina Lodge & Suites*, 538 F.3d 1031, 1040 (9th Cir. 2008) (same).

¹³ Statement of Interest of the United States of America, *ERC v. Abercrombie & Fitch Co.*, No. 1:09-cv-03157 (D. Md.), ECF No. 38, at *1 (July 6, 2010); *See also Hensley v. Eckerhart*, 461 U.S. 424, 445 (1983) (“All of these civil rights laws depend heavily upon private enforcement, and fee awards have proved an essential remedy if private citizens are to have a meaningful opportunity to vindicate the important Congressional policies which these laws contain.”).

¹⁴ *Norkunas v. HPT Cambridge, LLC*, 969 F. Supp. 2d 184, 194 (D. Mass. 2013) (Young, J.) (quoting *Iverson v. Braintree Prop. Assocs., L.P.*, No. 04-cv-12079-NG, 2008 WL 552652, at *3 n.5 (D. Mass. Feb. 26, 2008) (Gertner, J.)); *see also Murphy v. Bob Cochran Motors, Inc.*, No. 1:19-cv-00239, 2020 U.S. Dist. LEXIS 139887, at *15-16 (W.D. Pa. Aug. 4, 2020), *adopted by Murphy v. Bob Cochran Motors, Inc.*, 2020 U.S. Dist. LEXIS 177593 (W.D. Pa., Sept. 28, 2020) (upholding tester standing in a substantially identical ADA website accessibility case).

27. Consistent with these policies, Douglass files this case to ensure Defendant provides full and equal access to consumers with disabilities.

SUBSTANTIVE ALLEGATIONS

Defendant's Accessibility Policies and Inaccessible Digital Platform

28. Two of the most commonly used screen reader auxiliary aids are JAWS from Freedom Scientific (available on Windows computers) and VoiceOver (available on macOS and iOS devices).¹⁵

29. “JAWS, Job Access With Speech, is the world’s most popular screen reader, developed for computer users whose vision loss prevents them from seeing screen content or navigating with a mouse. JAWS provides speech and Braille output for the most popular computer applications on your PC. You will be able to navigate the Internet, write a document, read an email and create presentations from your office, remote desktop, or from home.”¹⁶

30. “VoiceOver is an industry-leading screen reader that tells you exactly what’s happening on your device. VoiceOver can now describe people, objects, text, and graphs in greater detail than ever. Auditory descriptions of elements help you easily navigate your screen through a Bluetooth keyboard or simple gestures on a touchscreen or trackpad. And with unique rotor gestures that function like a dial on

¹⁵ See *Screen Reader User Survey #9 Results*, WebAIM, [webaim.org, https://webaim.org/projects/screenreadersurvey9/](https://webaim.org/projects/screenreadersurvey9/) (last accessed Jan. 13, 2023).

¹⁶ JAWS®, Freedom Scientific, <https://www.freedomscientific.com/products/software/jaws/> (last accessed Jan. 13, 2023).

touchscreens and trackpads, you can make content such as websites a breeze to browse.”¹⁷

31. Here is an example of another online store’s successful use of audio descriptions to communicate its products to screen reader users.¹⁸ The image on the left illustrates what shoppers perceive visually when browsing the online store with an iPhone. To the right

is an image from the online store with the audio description highlighted for that image in green. Although invisible to the eye, screen access software reads this highlighted text aloud in order to describe the image to shoppers who cannot perceive content visually. In this example, when shoppers tab to the image file with a screen reader, the online store announces, “One burlap and cotton tote bag with a custom printed architectural company logo.” Blind shoppers require audio descriptions, frequently called “alternative text,” like this to access digital content fully, equally, and independently.

32. Unfortunately, because of Defendant’s failure to build the Digital Platform in a manner that is compatible with screen access software, Douglass is unable to fully and equally access Defendant’s products and services.

33. For example, as a result of visiting the Digital Platform in February 2022, and from investigations performed on his behalf at that time, Douglass found that he could not fully and equally access the Digital Platform in at least the following ways.

¹⁷ See *Accessibility*, Apple, <https://www.apple.com/accessibility/vision/> (last accessed Jan. 13, 2023).

¹⁸ See Custom Ink, Homepage, <https://www.customink.com/> (last accessed Mar. 28, 2019).

(a) The Digital Platform does not include sufficiently descriptive labels or instructions when content requires a shopper to submit information or activate particular features. Without these instructions, screen reader users cannot fully navigate the webpages. For example, consumers who perceive content visually will recognize the “decrease quantity” and “increase quantity” buttons on the Digital Platform and understand that by clicking them, Defendant will decrease and increase the size of their order accordingly. Unfortunately, these buttons are not labeled with sufficiently descriptive alternative text. When screen readers hover over these buttons, Defendant announces “hyphen minus” and “plus add,” respectively. This audio alternative is difficult to understand without perceiving the context in which it appears. As a result, screen reader users, including Plaintiff, are unlikely (or unable) to use this feature independently. Click the following link to view a short video demonstrating this access barrier: <https://youtu.be/vFTdBvghiR8>.

(b) Consumers who perceive content visually will notice a pop-up window after placing an item in their shopping cart. This pop-up window confirms the shopper placed the item in their shopping cart successfully and asks consumers whether they would like to checkout. Unfortunately, Defendant fails to notify screen readers when these pop-up windows appear. As a result, screen reader users, like Plaintiff, do not receive this confirmation and shortcut to the payment platform. Instead, screen reader users must tab back to the top of a webpage in order to complete a purchase. This burdensome, backward, and confusing interaction makes it more likely that Plaintiff and other blind shoppers will abandon the items in their shopping cart and leave the Digital Platform before completing a purchase. Click the following link to view a short video demonstrating this access barrier: <https://youtu.be/DvmcFsNqA8o>.

(c) Defendant does not provide a text equivalent for non-text elements. Providing text alternatives allows the information to be rendered in a variety of ways by a variety of consumers. A person who cannot see a picture, logo, or icon can have a text alternative read aloud using synthesized speech. For example, consumers who perceive content visually will notice various logos in the Digital Platform's footer identifying the payment methods that Defendant accepts, including American Express, Apple Pay, Diners Club, Discover, MasterCard, PayPal, and Visa. Unfortunately, Defendant's accessibility policies fail to ensure all of these logos include sufficiently descriptive alternative text. As a result, Plaintiff is unable to determine whether the Digital Platform accepts his preferred method of payment. Click the following link to view a short video demonstrating this access barrier: <https://youtu.be/DNg6H7C2j6k>.

(d) The Digital Platform does not provide a text equivalent for non-text elements. Providing text alternatives allows the information to be rendered in a variety of ways by a variety of users. A person who cannot see a picture, logo, or icon can have a text alternative read aloud using synthesized speech. For example, the Digital Platform provides a five-star rating for many products that Defendant sells. Consumers who perceive content visually can see whether a particular product has one, two, three, four, or five stars, and base their purchasing decisions on this information. Unfortunately, Defendant's accessibility policies fail to provide sufficiently descriptive alternative text for this important rating information. To this end, screen readers do not provide any audio information when they hover over the stars on the Digital Platform. As a result, Plaintiff must make his purchasing decisions without the benefit of knowing whether the products he's researching are well received by other consumers. Click the following link to view a short video demonstrating this access barrier: <https://youtu.be/C61WXEly-To>.

(e) The Digital Platform fails to describe the purpose of links and buttons sufficiently. As a result, screen reader users have difficulty understanding what information is contained on pages and how that information is organized. When link and button labels are clear and descriptive, screen reader users can find information they seek more easily, and they can understand the relationships between different pieces of content. For example, the social media links on the Digital Platform lack alternative text describing their purpose. Consumers who perceive content visually will likely recognize the Instagram, Facebook, Pinterest, and YouTube icons in the Digital Platform’s footer, and understand that by clicking these icons, Defendant will redirect them to its different social media communities. Unfortunately, these links are not labeled with sufficiently descriptive alternative text. As a result, screen reader users, like Plaintiff, are likely to skip over the icons without discovering Defendant’s online community and the members in it. This access barrier contributes to the very sense of isolation and stigma the ADA was intended to eliminate. Click the following link to view a short video demonstrating this access barrier: <https://youtu.be/-IyZhQK6TC0>.

34. Consistent with public policy encouraging the resolution of “dispute[s] informally by means of a letter[,]” *see Yahoo! Inc. v. La Ligue Contre Le Racisme Et L’Antisemitisme*, 433 F.3d 1199, 1208 (9th Cir. 2006), which “prelitigation solutions [are] clearly, the most expedient and cost-effective means of resolving” website accessibility claims, *see Sipe v. Am. Casino & Ent. Properties, LLC*, 2016 WL 1580349, at *2-3 (W.D. Pa. Apr. 20, 2016), Douglass contacted Defendant about its inaccessible Digital Platform and attempted to resolve his discrimination claims before commencing litigation. That attempt was unsuccessful.

35. As a result, Douglass and his counsel completed another review of Defendant’s Digital Platform in January 2023. This subsequent investigation confirms that notwithstanding

Douglass's good faith, pre-litigation attempts to resolve his concerns, Defendant's Digital Platform remains inaccessible and Defendant's accessibility policies and practices remain insufficient.

(a) Defendant prevents screen reader users from accessing some primary content. For example, when consumers visit the Digital Platform from a new IP address, Defendant displays a pop-up message to notify them of its cookies policy. Consumers who perceive content visually can click the button to learn more about how Defendant collects and shares their personal information with social media, advertising, and analytics partners. Unfortunately, Defendant does not alert screen readers of this pop-up message. Instead, screen readers remain focused on the content of the Digital Platform's underlying page, making Defendant's cookies policy invisible to screen reader users. As a result, it is impossible for Plaintiff to perceive this important legal disclosure independently. Click the following link to view a short video demonstrating this access barrier: <https://youtube.com/shorts/qm5qFlxDmR8?feature=share>.

(b) Defendant uses visual cues to convey content and other information. Unfortunately, screen readers cannot interpret these cues and communicate the information they represent to individuals with visual disabilities. For example, consumers who perceive content visually will notice that many products available for purchase on the Digital Platform include two prices. One price—a higher price—appears in strikethrough font. The other—a lower price—does not. Consumers who perceive content visually will understand that the price appearing in strikethrough font is the “old” or “original” price, while the price appearing in regular font is the “new” or “sale” price. Unfortunately, screen readers cannot identify the meanings of these two fonts so that users can make an informed decision. Instead, Defendant announces two prices for the same product, making it difficult for consumers to determine with certainty what they signify, like different quantities, conditions, sizes, or in this case, sales. This unnecessary confusion

frustrates Plaintiff's ability to make informed purchasing decisions and increases the odds he will abandon the purchase process without making a selection at all. Click the following link to view a short video demonstrating this access barrier: <https://youtube.com/shorts/VPLGYTOSRhE?feature=share>.

(c) Defendant prevents screen reader users from accessing order summaries. For example, consumers will notice a "Show order summary" button during Defendant's online checkout process. When consumers click this button, Defendant displays important order details, including a list of the products to be purchased, the quantity and price of such products, and the subtotal and total amount to be paid on the order. It also provides an opportunity for consumers to enter a gift card or discount code. Unfortunately, consumers who use screen readers to shop online cannot access this important order information. Instead, Defendant maintains the Digital Platform in such a way that screen readers skip over this information. As a result, Defendant deprives Plaintiff and other screen reader users of the ability to review a summary of their order before submitting their payment and completing a purchase. Click the following link to view a short video demonstrating this access barrier: <https://youtube.com/shorts/sftXVIViP68?feature=share>.

(d) Defendant fails to describe the purpose of links and buttons sufficiently. As a result, screen reader users have difficulty understanding what information is contained on pages and how that information is organized. When link and button labels are clear and descriptive, screen reader users can find information they seek more easily, and they can understand the relationships between different pieces of content. For example, the social media links on the Digital Platform lack alternative text describing their purpose. Consumers who perceive content visually will likely recognize the Instagram and Facebook icons in the Digital Platform's footer, and understand that by clicking these icons, Defendant will redirect them to its social media

communities. Unfortunately, these links are not labeled with sufficiently descriptive alternative text. As a result, screen reader users, like Plaintiff, are likely to skip over the icons without discovering Defendant's online community and the members in it. This access barrier contributes to the very sense of isolation and stigma the ADA was intended to eliminate. Click the following link to view a short video demonstrating this access barrier: <https://youtube.com/shorts/9joIFsYcTFA?feature=share>.

Plaintiff's Injury

36. The access barriers described above, and others, deny Douglass full and equal access to the Digital Platform today.

37. These barriers, together with Defendant's insufficient policies and practices, also humiliate and deter Douglass from returning to the Digital Platform, where he cannot help but feel second-class.

38. Still, Douglass intends to attempt to access the Digital Platform within the next six months to determine if it is accessible and, if so, to potentially explore the community, products, and services Defendant offers at that time.

Defendant Received Fair Notice of its ADA Obligations

39. Since its enactment in 1990, the ADA has clearly stated that covered entities must provide "full and equal enjoyment of the[ir] goods, services, facilities, privileges, advantages, or accommodations" to people with disabilities,¹⁹ and must "ensure that no individual with a disability is excluded, denied services, segregated or otherwise treated differently than other individuals because of the absence of auxiliary aids and services."²⁰

¹⁹ 42 U.S.C. § 12182(a).

²⁰ 42 U.S.C. § 12182(b)(2)(A)(iii).

40. DOJ first announced its position that Title III applies to websites of public accommodations in a 1996 letter from Assistant Attorney General Deval Patrick responding to an inquiry by Senator Tom Harkin regarding the accessibility of websites to blind individuals.²¹

41. In 2000, DOJ argued to the Fifth Circuit that a business providing services solely over the internet is subject to the ADA's prohibitions on discrimination on the basis of disability.²²

42. In 2002, DOJ argued to the Eleventh Circuit that there need not be a nexus between a challenged activity and a private entity's "brick-and-mortar" facility to obtain coverage under Title III. DOJ argued that Title III applies to any activity or service offered by a public accommodation, on or off the premises.²³

43. In 2014, DOJ entered into a settlement agreement with America's then-leading internet grocer to remedy allegations that its website was inaccessible to some individuals with disabilities.²⁴

44. In a 2018 letter to U.S. House of Representative Ted Budd, U.S. Department of Justice Assistant Attorney General Stephen E. Boyd confirmed: "[t]he Department [of Justice] first

²¹ Letter from Deval L. Patrick, Assistant Attorney General, Civil Rights Division, Department of Justice, to Tom Harkin, U.S. Senator (Sept. 9, 1996), <https://www.justice.gov/crt/foia/file/666366/download> (last accessed Jan. 13, 2023).

²² Brief of the United States as Amicus Curiae in Support of Appellant, *Hooks v. Okbridge, Inc.*, No. 99-50891 (5th Cir. June 30, 2000), <https://www.justice.gov/sites/default/files/crt/legacy/2010/12/14/hooks.pdf> (last accessed Jan. 13, 2023) ("A COMMERCIAL BUSINESS PROVIDING SERVICES SOLELY OVER THE INTERNET IS SUBJECT TO THE ADA'S PROHIBITION AGAINST DISCRIMINATION ON THE BASIS OF DISABILITY.") (emphasis in original).

²³ Brief for the United States as Amicus Curiae in Support of Appellant, *Rendon v. Valleycrest Productions, Inc.*, No. 01-11197, 294 F.3d 1279 (11th Cir. 2002), <https://www.justice.gov/sites/default/files/crt/legacy/2010/12/14/renderon.pdf> (last accessed Jan. 13, 2023).

²⁴ See Settlement Agreement Between the United States of America and Ahold U.S.A., Inc. and Peapod, LLC, DJ 202-63-169 (Nov. 17, 2014), <https://www.justice.gov/file/163956/download> (last accessed Jan. 13, 2023).

articulated its interpretation that the ADA applies to public accommodations’ websites over 20 years ago. This interpretation is consistent with the ADA’s title III requirement that the goods, services, privileges, or activities provided by places of public accommodation be equally accessible to people with disabilities.”²⁵

45. In 2019, the United States Supreme Court declined to review a Ninth Circuit decision holding that Title III covers websites and mobile applications.²⁶

46. In 2022, DOJ published “Guidance on Web Accessibility and the ADA,” reiterating that DOJ “has consistently taken the position that the ADA’s requirements apply to all the goods, services, privileges, or activities offered by public accommodations, including those offered on the web.”²⁷

SUBSTANTIVE VIOLATION

Title III of the ADA, 42 U.S.C. § 12181 *et seq.*

47. The assertions contained in the previous paragraphs are incorporated by reference.

48. Douglass is an individual with a “disability.” With respect to an individual, the ADA defines “disability” as “a physical or mental impairment that substantially limits one or more major life activities of such individual[.]” 42 U.S.C. § 12102(1)(A). The ADA defines “major life activities” to include, in relevant part, “seeing[.]” 42 U.S.C. § 12102(2)(A). Because Douglass is blind, he meets Title III’s definition of an individual with a disability.

²⁶ See *Robles v. Domino’s Pizza, LLC*, 913 F.3d 898 (9th Cir. 2019), *cert. denied* 140 S. Ct. 122 (2019) (No. 18-1539).

²⁷ Civil Rights Division, Department of Justice, *Guidance on Web Accessibility and the ADA* (Mar. 18, 2022), <https://beta.ada.gov/resources/web-guidance/> (last accessed Jan. 13, 2023).

49. Defendant operates a place of public accommodation under Title III. Title III defines a “public accommodation” as including a “sales or rental establishment” and/or “other service establishment[.]” 42 U.S.C. § 12181(7)(E), (F). Because Defendant provides goods and services to the general public, it meets Title III’s definition of a place of public accommodation.

50. Title III begins with a general rule that “[n]o individual shall be discriminated against on the basis of disability in the full and equal enjoyment of the goods, services, facilities, privileges, advantages, or accommodations of any place of public accommodation.” 42 U.S.C. § 12182(a).

51. The statute contains several general prohibitions, including a prohibition against “denying an individual on the basis of a disability ‘the opportunity . . . to participate in or benefit from the goods [or] services’ of a public accommodation.” 42 U.S.C. § 12182(b)(1)(A)(i).

52. These general prohibitions are supplemented by several specific prohibitions, including an auxiliary aids and services requirement, which requires public accommodations to “take such steps as may be necessary to ensure that no individual with a disability is excluded, denied services, segregated or otherwise treated differently than other individuals because of the absence of auxiliary aids and services.” 42 U.S.C. § 12182(b)(2)(A)(iii).

53. The United States Department of Justice (“DOJ”) has issued regulations implementing the ADA, including the auxiliary aid and service requirement.

54. These regulations define “screen reader software,” like what Douglass used to attempt to access the Digital Platform, as being a covered “auxiliary aid and service.” 28 C.F.R. § 36.303(b)(2).

55. The regulations also include an effective communication requirement, which requires public accommodations to “furnish appropriate auxiliary aids and services where

necessary to ensure effective communication with individuals with disabilities.” 28 C.F.R. § 36.303(c)(1).

56. DOJ has issued regulatory guidance noting that the duty to provide effective communication with customers is implicit in the duty of a public accommodation to provide auxiliary aids and services. Appx. A to Part 36 - Guidance on Revisions to ADA Regulation on Nondiscrimination on the Basis of Disability by Public Accommodations and Commercial Facilities.²⁸

57. DOJ also has issued a Technical Assistance Publication, which provides guidance on communicating effectively with individuals who have vision, hearing, or speech disabilities. Dep’t of Justice, ADA Requirements: Effective Communication (Jan. 2014).²⁹ This publication requires the provision of “information technology that is accessible (either independently or through assistive technology such as screen readers).” *Id.*

58. Defendant has violated Title III’s general anti-discrimination mandate and effective communication requirement by failing to ensure the Digital Platform is fully and equally accessible through screen reader auxiliary aids.

59. This unequal access also humiliates and deters Douglass from attempting to access the Digital Platform, forcing him to wait until Defendant elects to retrofit the Digital Platform to be accessible.

PRAYER FOR RELIEF

WHEREFORE, Douglass requests judgment as follows:

²⁸ This guidance is available at <https://www.ecfr.gov/current/title-28/chapter-I/part-36/appendix-Appendix%20A%20to%20Part%2036> (last accessed Jan. 13, 2023).

²⁹ This guidance is available at <http://www.ada.gov/effective-comm.htm> (last accessed Jan. 13, 2023).

(A) A declaratory judgment that at the commencement of this action Defendant was in violation of the specific requirements of Title III of the ADA described above, and the relevant implementing regulations of the ADA, in that Defendant took no action that was reasonably calculated to ensure Douglass could fully, equally, and independently access Defendant’s online community, products, and services;

(B) A permanent injunction, pursuant to 42 U.S.C. § 12188(a)(2) and 28 CFR § 36.504(a), which directs Defendant to take all steps necessary to ensure its products and services are fully, equally, and independently accessible to Douglass, and which further directs that the Court shall retain jurisdiction for a period to be determined to ensure that Defendant has adopted and is following policies and practices that will cause Defendant to remain in compliance with the law—the specific injunctive relief requested by Plaintiff is described more fully below;

(1) Within 90 days of the Court’s order, Defendant shall complete an accessibility audit of its Digital Platform that will examine the accessibility and usability of the Digital Platform by consumers who are blind.

(2) Within 180 days of the Court’s order, Defendant shall develop a corrective action strategy (“Strategy”) based on the audit findings. In addition to the deadlines outlined below, the Strategy shall include dates by which corrective action shall be completed.

(3) Within 210 days of the Court’s order, Defendant shall disseminate the Strategy among its executive-level managers, employees, and contractors, if any, involved in digital development and post it on the Digital Platform.

(4) Within 90 days of the Court’s order, Defendant shall develop a Digital Accessibility Policy Statement that demonstrates its commitment to digital accessibility to blind and other print disabled consumers, as required by the Americans with Disabilities Act. This Policy

Statement shall be posted in the header of each homepage on the Digital Platform within 120 days of the Court's order, and shall disclose that an audit is taking or has taken place and that a Strategy will be disseminated and posted on the Digital Platform within 180 days of the Court's order.

(5) Within 240 days of the Court's order, Defendant shall develop procedures to implement its Digital Accessibility Policy across the entire Digital Platform. Defendant shall disseminate its Policy and procedures to its executive-level managers, employees, and contractors, if any, involved in digital development.

(6) Within 12 months of the Court's order, Defendant shall conduct training, instruction and support to ensure that all executive-level managers and employees involved in digital development are aware of and understand the Digital Accessibility Policy, including proper procedures, tools, and techniques to implement the Digital Accessibility Policy effectively and consistently.

(7) Within 12 months of the Court's order, Defendant shall hire or designate a staff person with responsibility and commensurate authority, to monitor the Digital Accessibility Policy and procedures.

(8) Within 12 months of the Court's order, Defendant shall develop and institute procedures that require third-party content and plug-ins built into the Digital Platform to provide blind consumers the same programs, benefits and services that they do to individuals without disabilities, except when it is technically unfeasible to do so. Defendant shall effectuate these obligations by, among other things, implementing as part of its Request for Proposal process language that bidders meet the accessibility standards set forth in WCAG 2.1 Level AA for web-based technology and the Americans with Disabilities Act; requiring or encouraging, at Defendant's discretion, as part of any contract with its vendors, provisions in which the vendor

warrants that any technology provided complies with these standards and any applicable current federal disability law.

(9) Within 18 months, all pages hosted on the Digital Platform that have been published shall be Accessible to blind users. “Accessible” means fully and equally accessible to and independently usable by blind individuals so that blind consumers are able to acquire the same information, engage in the same interactions, and enjoy the same services as sighted consumers, with substantially equivalent ease of use.

(10) Defendant shall not release for public viewing or use a substantial addition, update, or change to the Digital Platform until it has determined through automated and end-user testing that those proposed additions, updates, or changes are Accessible.

(11) Defendant shall conduct (a) an automated scan monthly and (b) end-user testing quarterly thereafter to ascertain whether any new posted content is Accessible. Defendant shall notify all employees and contractors, if any, involved in digital development if corrections to the Digital Platform are needed and of reasonable timelines for corrections to be made. Defendant shall note if corrective action has been taken during the next monthly scan and quarterly end-user test.

(12) Following the date of the Court’s order, for each new, renewed, or renegotiated contract with a vendor of third-party content, Defendant shall seek a commitment from the vendor to provide content in a format that is Accessible.

(13) Defendant shall provide Plaintiff, through his counsel, with a report on the first and second anniversaries of the Court’s order which summarizes the progress Defendant is making in meeting its obligations. Additional communication will occur before and after each

anniversary to address any possible delays or other obstacles encountered with the implementation of the Digital Accessibility Policy.

(C) Payment of actual, statutory, nominal, and other damages, as the Court deems proper;

(D) Payment of costs of suit;

(E) Payment of reasonable attorneys’ fees, pursuant to 42 U.S.C. § 12205 and 28 CFR § 36.505, including costs of monitoring Defendant’s compliance with the judgment;³⁰

(F) Whatever other relief the Court deems just, equitable and appropriate; and

(G) An order retaining jurisdiction over this case until Defendant has complied with the Court’s orders.
